PROJECTS

Retail POS Management System **Live:** final-retail-pos.onrender.com

Python, Django, PostgreSQL, JavaScript, Tailwind CSS, DaisyUI, Cloudinary, Resend Email API, Khalti(Sandbox), Render

- Built a role-based POS system for shop owners and staff with secure authentication and RBAC.
- Implement inventory management, sales tracking, daily summary dashboard, and target setting.
- Generated and printed invoices on demand with detailed reporting modules.
- Automated email notifications using Resend API.
- Store and managed media using Cloudinary and deployed the system on Render.

Sports E-Commerce Platform **Live:** sushantpahari.pythonanywhere.com

Python, Django, Sqlite, JavaScript, Tailwind CSS

- Built a two-sided marketplace with seperate dashboards for buyers and sellers.
- Implement product management, cart, checkout and order management workflows.
- Created 5-stage order status: confirmed - shipped - delivered - paid.
- Deployed and maintained live application on PythonAnywhere.

Event Management System **Live:** ems.sushanta.me

7th sem college project completed on collaborative work with the group of 3.

- Major focus on implementation of normalized database schema for events, users and bookings.
-

TRAINING / CERTIFICATIONS

- **Python with Django Course** conducted by **Code IT**.
- **Python** by **HackerRank**
